

KkaloAI

COMMERCIAL PROPOSAL

Partnership & Investment Brief
REF · KKL-2026-04 · ONE-PAGER
April 2026 · v1.0

B2B PARTNERSHIP · INVESTMENT · WELLNESS PROGRAMS

A new standard for **AI nutrition tracking** built around transparency, not paywalls.

KkaloAI is launching into a \$14B+ category dominated by aging incumbents and shallow AI clones. We're betting on the inverse: user-controlled AI, transparent pricing, and four specialty health modes nobody else ships. This brief outlines the offer for clinics, dietitians, wellness employers, and early-stage investors.

\$14B+

Health & nutrition apps TAM by 2026

220M

MyFitnessPal users — yet revenue down 5.7% YoY

24M+

Projected GLP-1 users in US by 2030 (no app serves them)

50%+

Funnel drop-off at email/payment gate (industry avg)

Who we are

KkaloAI is a mobile-first AI nutrition platform founded in 2026, headquartered remotely with operations in Eastern Europe. Built by an indie product team with a track record in mobile growth, the product is engineered around one principle: *the user always confirms*.

Where competitors hide pricing behind onboarding, KkaloAI puts every tier on the home screen. Where they ship one-shot AI estimates, KkaloAI ships an adjustable slider. Where they ignore underserved health journeys, KkaloAI bakes them in as first-class modes.

Launching iOS + Android simultaneously with native Health Connect integration. Built to be the calorie tracker MyFitnessPal users defect to.

What we offer

AI Photo + Confirm & Adjust

SIGNATURE

Snap a meal, fine-tune the portion estimate (0.5×–2.5× slider), then confirm.

GLP-1 Support Mode

FIRST

Injection day, side effects, protein floor, hydration cycle — built for Ozempic/Wegovy users.

PCOS & Hormonal Balance

FIRST

Cycle-phase aware, carb-quality scoring, micronutrient watch (inositol, Mg, D).

Bulking & Weight Modes

Adaptive surplus / deficit driven by trend math, not daily scale noise.

Health Connect 2-Way

Native Android Health Connect & Apple Health sync — read and write.

Anonymous Auth + 7-Day Trial

Try the full Premium without an email or card. Day-7 graceful downgrade.

Simple, transparent, no surprises

or \$7.99/mo · cancel anytime

- ✓ Everything in Trial
- ✓ 3D Scan Export (Q3 2026)
- ✓ Cloud backup & multi-device
- ✓ Priority AI processing
- ✓ Support < 24h

WHY KKALOAI • 6 REASONS TO BACK THE LAUNCH

1 Empty lane in a crowded market

Zero of the top 10 apps ship dedicated GLP-1 or PCOS modes. Two underserved niches with millions of users.

2 Trust-led pricing

No payment info for trial. No dark-pattern paywalls. The #1 churn complaint in the category — fixed.

3 User-controlled AI

The 0.5×–2.5× slider directly addresses "AI got it wrong" — the leading cause of nutrition-app uninstalls.

4 Native ecosystem fit

First-class two-way Health Connect on Android — moat against apps still shipping one-way exports.

5 Built-in viral loop

Daily-win cards + 3D scan exports turn users into a TikTok-led CAC channel. Proven indie growth playbook.

6 Lean economics

Solo-founder operation, low fixed cost, mobile-first stack. Path to profitability without venture treadmill.

WHO THIS PROPOSAL IS FOR

Dietitians & Clinics

B2B portal: assign KkaloAI to clients, view their logs (with consent), reduce in-session intake time. White-label option Q4 2026.

Wellness Programs

Employer & insurer bundles: bulk Premium licenses with aggregated, anonymized engagement reporting.

Investors & Angels

Pre-seed / seed conversation. Lean burn, indie ethos, defensible niche entry, clear monetization path.

Let's talk

Whether you're a clinic looking for a client-facing tracker, an employer building a wellness benefit, or an investor scouting indie momentum — there's a 30-minute conversation that's worth your time.
